

Khalil Rezgui

Site Reliability & Platform Engineer

Tunis, Tunisia (UTC+1) · khalilrezgui0@gmail.com · linkedin.com/in/khalil-rezgui · github.com/khalilrez
Italian citizen: EU work authorization, no sponsorship needed · Remote since 2024 with a Paris-based team

SUMMARY

SRE and DataOps engineer with two years of production on-call on GCP and HashiCorp Nomad. Kept 99.9% uptime, cut MTTR by 65% with a full observability stack, and migrated MySQL to ClickHouse for 100x faster queries. Promoted to Technical Project Lead for delivery and cost ownership, working remotely with a Paris-based team.

EXPERIENCE

Technical Project Lead

Jan 2026 – Present

The Quantic Factory · Paris, France (remote)

- Own reliability and delivery for 5+ production data workstreams (CRM, tracking, monitoring, attribution, identity resolution), coordinating priorities and deadlines for the team.
- Led a company-wide infrastructure and FinOps redesign across GCP, BigQuery, MySQL, ClickHouse, Hetzner and Scaleway; defined a “cost per million events” KPI and a roadmap to absorb ~20x ingestion growth.
- Built SQL/ClickHouse post-production validation that catches event-volume anomalies and identifier gaps before customers are affected.
- Directed failure-mode benchmarks of ingestion architectures (direct ClickHouse, managed queues, HA Nomad) under a 20x load scenario.

DataOps & Site Reliability Engineer

Jan 2024 – Jan 2026

The Quantic Factory · Paris, France (remote)

- Carried on-call and overnight pager duty; resolved live incidents (MySQL crashes, pipeline bugs) by rollback or in-incident debugging while sustaining 99.9% uptime on GCP and HashiCorp Nomad.
- Built the observability and alerting stack (Fluentd, Elasticsearch, Graylog, Grafana, Prometheus) across 100+ daily jobs, cutting mean time to resolution by 65%.
- Migrated critical data from MySQL to ClickHouse with zero downtime (blue-green): 100x faster queries on 10M+ records.
- Led a team optimizing GCP infrastructure for a 50% cost reduction.
- Turned recurring failures into alerts, runbooks and recovery workflows (restart, rollback, database recovery, post-recovery validation).

SELECTED PROJECTS

Production Incident Detection & Recovery (2025). Centralized monitoring across infrastructure, application and data-quality signals, with restart, rollback and database-recovery runbooks. Introduced the company's first dedicated on-call platform.

Enterprise CI/CD Pipeline (2023). Jenkins, SonarQube and Git for a Spring Boot/Angular app: 1-hour manual release to 15-minute automated deploys, 85% coverage.

SKILLS

Reliability	On-call · Incident response · Runbooks · Rollback & recovery · Alerting · MTTR reduction
Observability	Prometheus · Grafana · Graylog · Fluentd · Elasticsearch · OpenTelemetry
Cloud & infra	GCP · Azure · Docker · Kubernetes · HashiCorp Nomad · Ansible · CI/CD (Jenkins, GitHub Actions)
Data	ClickHouse · MySQL · PostgreSQL · BigQuery · DuckDB · Message queues
Code	Go · Python · SQL · Bash · Rust · JavaScript · Java

EDUCATION & LANGUAGES

Engineering Degree in Computer Science, Cloud Computing & IT Architecture	2024
Esprit School of Engineering, Tunis · Top of the class, final-year project with highest honors	
Licence in Computer Science & Multimedia	2021
Higher Institute of Multimedia, Manouba	
Azure Fundamentals (AZ-900), 2023 · English (fluent) · French (fluent) · Arabic (native)
