

Khalil Rezgui

Data Engineer

Tunis, Tunisia (UTC+1) · khalilrezgui0@gmail.com · linkedin.com/in/khalil-rezgui · github.com/khalilrez · portfolio.khalilrezgui0.workers.dev
Italian citizen: EU work authorization, no sponsorship needed · Remote since 2024 with a Paris-based team

SUMMARY

Data engineer who owns pipelines end to end: ingestion, ClickHouse and BigQuery storage, data-quality monitoring and cost per event. Migrated critical analytics from MySQL to ClickHouse (100x faster on 10M+ records) and designed the architecture roadmap for ~20x event growth. Technical Project Lead, remote with a Paris-based team.

EXPERIENCE

Technical Project Lead

Jan 2026 – Present

The Quantic Factory · Paris, France (remote)

- Led a data architecture and FinOps redesign across GCP, BigQuery, MySQL, ClickHouse, Hetzner and Scaleway; built a cost model and a roadmap to absorb ~20x ingestion growth without proportional cost.
- Benchmarked ingestion and storage options (direct ClickHouse, managed queues, HA Nomad, optimized MySQL, DuckLake/Parquet on object storage) on throughput, CPU/RAM, storage footprint and projected cost.
- Defined 4+ data-quality KPIs (identifiable and identified sessions, hard candidate and identification rates) and compared BFS and DSU engines across 2-day to 7-month windows to validate an identity-resolution system.
- Built SQL/ClickHouse monitoring for event volumes, identifier coverage and source consistency; own 5+ production data workstreams.

DataOps & Site Reliability Engineer

Jan 2024 – Jan 2026

The Quantic Factory · Paris, France (remote)

- Migrated critical analytics from MySQL to a ClickHouse cluster with zero downtime: 100x faster queries and real-time diagnostics on 10M+ records.
- Built a server-side event collection pipeline in Go (Docker, Nomad) routing events to multiple destinations such as Meta and Google Ads.
- Built the observability stack (Fluentd, Elasticsearch, Graylog, Grafana, Prometheus) across 100+ daily jobs, cutting MTTR by 65%; 99.9% uptime on GCP and Nomad.
- Shipped a Python AI agent to production with 85% prediction accuracy.
- Led a team optimizing GCP data infrastructure for a 50% cost reduction.

SELECTED PROJECTS

Customer Identity Resolution & Graph Validation (2026). KPI framework and engine comparison (BFS vs DSU) validating event-to-profile matching over 2-day, 30-day, 60-day and 7-month windows.

Multi-Agent AI Orchestrator (2025). Built from scratch to answer complex Shopify analytics queries, with OpenTelemetry tracing end to end.

SKILLS

Data stores	ClickHouse · BigQuery · MySQL · PostgreSQL · DuckDB/DuckLake · Parquet & object storage
Pipelines	ETL · Message queues · Pub/Sub · Server-side event ingestion · Data quality & validation
Code	SQL · Python · Go · Bash · Rust
Cloud & infra	GCP · Docker · Kubernetes · HashiCorp Nomad · Ansible · CI/CD
Observability	Grafana · Prometheus · Graylog · Fluentd · Elasticsearch · OpenTelemetry

EDUCATION & LANGUAGES

Engineering Degree in Computer Science, Cloud Computing & IT Architecture	2024
Esprit School of Engineering, Tunis · Top of the class, final-year project with highest honors	
Licence in Computer Science & Multimedia	2021
Higher Institute of Multimedia, Manouba	
Azure Fundamentals (AZ-900), 2023 · English (fluent) · French (fluent) · Arabic (native)
