

Khalil Rezgui

Cloud Engineer (GCP)

Tunis, Tunisia (UTC+1) · khalilrezgui0@gmail.com · linkedin.com/in/khalil-rezgui · github.com/khalilrez · portfolio.khalilrezgui0.workers.dev
Italian citizen: EU work authorization, no sponsorship needed · Remote since 2024 with a Paris-based team

SUMMARY

Cloud and SRE engineer running production on Google Cloud (Pub/Sub, Cloud Run, Cloud Functions, BigQuery). Led a 50% GCP cost reduction and built a cost-per-million-events model that makes cloud spend an engineering metric. 99.9% uptime, 65% lower MTTR. Technical Project Lead, remote with a Paris-based team.

EXPERIENCE

Technical Project Lead

Jan 2026 – Present

The Quantic Factory · Paris, France (remote)

- Led a company-wide cloud cost and architecture redesign across GCP, BigQuery, MySQL, ClickHouse, Hetzner and Scaleway; defined a “cost per million events” KPI separating traffic-driven, fixed and mixed costs.
- Designed the target architecture and roadmap to absorb ~20x ingestion growth without linear cost increase, after benchmarking managed queues, serverless pipelines and self-hosted HA clusters.
- Built SQL/ClickHouse monitoring that flags anomalous event volumes and cost or usage patterns; own 5+ production data workstreams.

DataOps & Site Reliability Engineer

Jan 2024 – Jan 2026

The Quantic Factory · Paris, France (remote)

- Led a GCP optimization initiative for a 50% cost reduction: removed obsolete and cost-heavy services (Pub/Sub, Cloud Run, Cloud Functions, BigQuery) and rewrote hot production paths in Go to cut memory use.
- Operated production on GCP and HashiCorp Nomad at 99.9% uptime, including on-call and overnight pager duty.
- Built the observability stack (Cloud Monitoring, Prometheus, Grafana, Fluentd, Graylog) across 100+ daily jobs, cutting MTTR by 65%.
- Migrated MySQL workloads to ClickHouse with zero downtime: 100x faster queries on 10M+ records.
- Shipped a Python AI agent to production with 85% prediction accuracy.

SELECTED PROJECTS

Cost per Million Events Model (2026). Cost model splitting traffic-driven and fixed spend across GCP, BigQuery, ClickHouse, MySQL and bare-metal providers; turned the monthly invoice into an engineering metric.

Multi-Agent AI Orchestrator (2025). Built from scratch to answer complex Shopify analytics queries, with OpenTelemetry tracing end to end.

SKILLS

Google Cloud	Pub/Sub · Cloud Run · Cloud Functions · BigQuery · IAM · Cloud Monitoring & Logging · Cloud DNS
Cost & architecture	FinOps · Cost modelling · Capacity planning · Benchmarking · Multi-cloud (Hetzner, Scaleway, Azure)
Infra	Docker · Kubernetes · HashiCorp Nomad · Ansible · CI/CD (Jenkins, GitHub Actions)
Reliability	On-call · Prometheus · Grafana · Graylog · Fluentd · Elasticsearch
Code & data	Go · Python · SQL · Bash · ClickHouse · BigQuery · MySQL

EDUCATION & LANGUAGES

Engineering Degree in Computer Science, Cloud Computing & IT Architecture	2024
Esprit School of Engineering, Tunis · Top of the class, final-year project with highest honors	
Licence in Computer Science & Multimedia	2021
Higher Institute of Multimedia, Manouba	
Azure Fundamentals (AZ-900), 2023 · English (fluent) · French (fluent) · Arabic (native)
